SPECIFICATIONS **BRUSHGRADE COMPOUND**

Description:	A blend of waxes, oils, rust inhibitors, wetting agents and chemicals, which when combined result in a flexible compound some 75% solids content designed specifically for the protection of rusted nuts, bolts and foundation platework. It will not chip, harden or crack and readily penetrates into cracks, threads and areas between steel and concrete.
Application:	A liberal coating by brush. (Not sprayable).
Coverage:	2m squared per litre.
Colour:	Dark Grey.
Thinning:	Not recommended.
Solvent:	Stoddards solvent, turps. (Cleaning purposes only).
Preparation:	All scale rust and grime should be removed by chipping and/or wire brushing to leave a clean dry surface prior to application. If surfaces are exposed to salt water spray they should be washed with fresh water to remove contamination. Sandblasting is not a prerequisite of Goldseal Brushgrade.
Availability:	In 4 litre packs.
