SPECIFICATIONS **ALGAE DEATH**

Description:	AlgaeDeath is a Quaternary Ammonium Germicide Compound. It is a aqueous solution of a selected blend of Alkyl Dimethyl Benzyl ammonium Chlorides, manufactured to comply with the standard for Benzalkonium Chloride solution in the British Pharmacopoeia 1968. MAF APPROVED
Features:	Ease of application, freedom from unpleasant odours, efficient and rapid germicidal activity at low concentrations against a wide range of micro-organisms.
Typical Uses:	Algae and slime control in swimming pools, moss and grime control on a large variety of surfaces including fibrolite, concrete, clay tiles etc. Disinfection of cleaned soft porous surfaces.
Application:	Dilute 8 parts ALGEADEATH to 100 parts water. Can be applied by spray or sprinkler on drives, concrete surfaces and tiles. Allow 7 to 10 days prior to waterblasting.
Appearance:	Clear, colourless to light strain viscous liquid.
Odour:	Slight aromatic, none in dilutions.
Solubility:	Completely soluble in water lower alcohols and ketones.
Surface Activity:	Aqueous solutions of "AlgaeDeath" are highly surface active and will effectively wet surfaces, resulting in rapid penetration of moss covered or grime covered surfaces.
Availabilitiy	20 Litre Packs.
